With the advancement of medical technology, hair replacement is turning more popular today especially among people suffering from severe hair loss problem. However the first hair replacement surgery was performed over 30 years ago. Therefore, it is not new now in fact there is a high success rate of hair replacement with less complications which cost has reasonable than other form of hair development. If you are planning for hair replacement, please regard these following instructions:

- Make sure that you must have some hair in good condition at the back and sides of your head for your hair replacement. The specialists mostly take your existing hair from the donor area during the process of hair replacement. - If you don't have hair then no hair replacement center could help you. You have to meet the ratio of minimum hair present in your head to be eligible for a hair transplant.- Hair replacement surgery is almost with out side effects and safe. However, in rare instances there could be infections during the surgical procedure.- You will be provided local anesthesia, so that you will not feel any pain or trouble during your hair replacement surgery.No doubt permanent hair replacement is a long process which requires one to five sessions, with an interval of two to four months between replacement sessions. However the entire hair replacement application can take 24 to 30 months. You will be advised by your physician and he may restrict you from sporting activities after each hair replacement session. It is strictly to say that you should follow all medical recommendations. Permanent hair replacement is a completely individual process and you must ask your specialist how your hair will look after the hair replacement process.Make sure that your surgeon is well qualified and have sufficient knowledge about hair treatment. Overview his successful executed hair replacements processes and know about his experience in the application of all modern techniques.Hair replacement is a final solution to the problem of hair loss. However the result of permanent hair replacement varies from person to person so you have to take the risk of trying your luck out.{mosgoogle left}
