A lot of men and women are looking for help to treat hair loss. It is a problem affecting one's social life. Nearly 90% of the human population care a lot about their look. And in our society people without hair are very often considered not as beautiful or healthy as people with full, healthy looking hair.

Lotions, medicines, and shampoos are available to stop or prevent hair loss. Hair loss products can be purchased at drugstores or pharmacies. Some are only available by prescription. Which hair loss treatment to choose depends on what is causing the hair loss. Hair loss is cured by medicating individuals that suffer from hair loss caused by aging, heredity and hormonal imbalance. Dihydro testosterone otherwise called as DHT is found to be the main cause of hair loss. Excessive levels of DHT block the hair follicle and thereby provoking hair fall. This effect can be nullified by using DHT inhibitors such as 5-alpha reductase.

The common hair loss cure products available on the market are NuGen Hp, Revivogen, and Hair Genesis. All these drugs help a lot in blocking the DHT in the scalp and help preventing hair loss. Revivogen reduces DHT level in the scalp thereby reduces hair loss and promotes healthy re-growth of hairs.

NuGen Hp is a natural treatment available for hair loss. This product also helps a lot to block DHT in the scalp. By eating protein rich food and protein supplements, hair loss can be stopped or cured. During any remedial measure, it is always recommended to put a person on proper nutrition by ending abnormal eating habits.

Saw palmetto is an active ingredient of Hair Genesis which is very effective in preventing hair loss. Hence it is a natural DHT blocker and helps preventing male hair loss. Saw palmetto is a natural medication available for blocking DHT. There are lots of medications available on the market for preventing hair loss.

Hair loss cure is achieved by using conditioners, shampoo and scalp lotions. The common products that help are Revivogen, Viviscal, Folligen, Tricomin and Nisim. It is known fact that medicationa like Folligen directly supplies the nutrient copper.. Tricomin also contains nutrient copper. This product is available in Tricomin revitalizing shampoo, tricomin Restructuring conditioner, and Tricomin shampoo. It is a known fact that nutrient copper helps healthy growth of hair and prevents hair loss.

Minoxdil hair loss cure is also used to preventing hair loss. This drug is more useful among youngsters. Hair Renew is a product used for hair loss cure. The mode of action for this product is nourishing the hair follicles, cleansing the scalp, and neutralizing the DHT.{mosgoogle left}
